

Starter and Professional Account Comparison

Help in selecting the right Cloud account.

What is this?

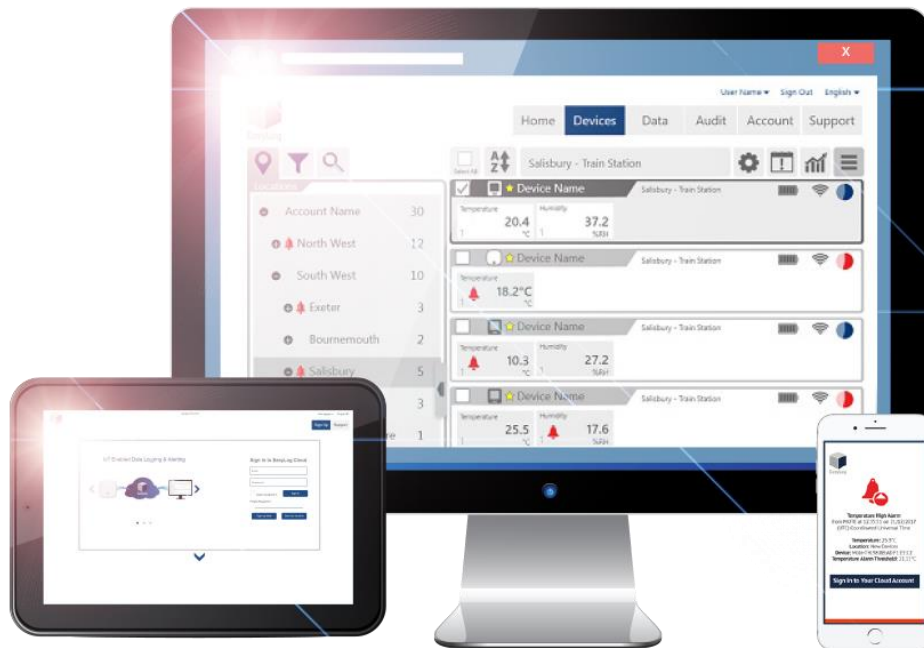

This Help Guide has been produced to offer guidance on choosing the correct EasyLog™ Cloud account to suit your requirements.

Which EasyLog™ Cloud account is right for me?

EasyLog™ Cloud and hardware harness the power of IoT to automate data logging and alert notifications. There are two account types available, Starter and Professional.

Starter accounts are ideal for compact personal systems with up to four measurement points and limited data storage requirements.

Professional accounts are ideal for small business solutions with just a few measurement points to corporate solutions with thousands of sensors around the globe.

The following table details the feature differences between **Starter** and **Professional** account types.

Starter and Professional Account Comparison

Help in selecting the right Cloud account.
